

	Risk	Statement	Response	Objective	Likelihood	Impact
1	Prioritising tasks	If i focus on a feature which is not important i wont have the minmimum viable product ready.	While working on the project minimum viable product should be main priority.	Prioritising tasks to leave any unimportant task for last.	8	20
2	Selenium Testing issues	While testing my front end work I need to make sure I use the 'inspect' button to copy the exact path/id I need.	This will ensure that I am testing the exact component I am after.	This makes my test run smoothly and ensures I am testing the right thing.	8	12
3	Falling behind	If I get stuck on a task for too long and it prevents me from doing other tasks.	I will ensure i seek for help with my trainers so they can help me with the issue and get me going.	Making sure I seek help when stuck on a problem for too long.	15	20
4	Database connection issue	I was having issues with connecting my project to the database server i had setup.	I did some research online and figured out a solution which was sucessful to solve my problem.	Make sure i do my own research and search for solutions or ideas.	6	12
5	my work gets deleted	make sure I save my work and push to github.	while I work on my project I make sure I constantly keep saving any updates.	make sure I save my work and use a USB stick.	4	20
